

Interactive discussion: “The bridge to the future”

The deployment of YAKSHA software in ASEAN and the role of Ambassadors

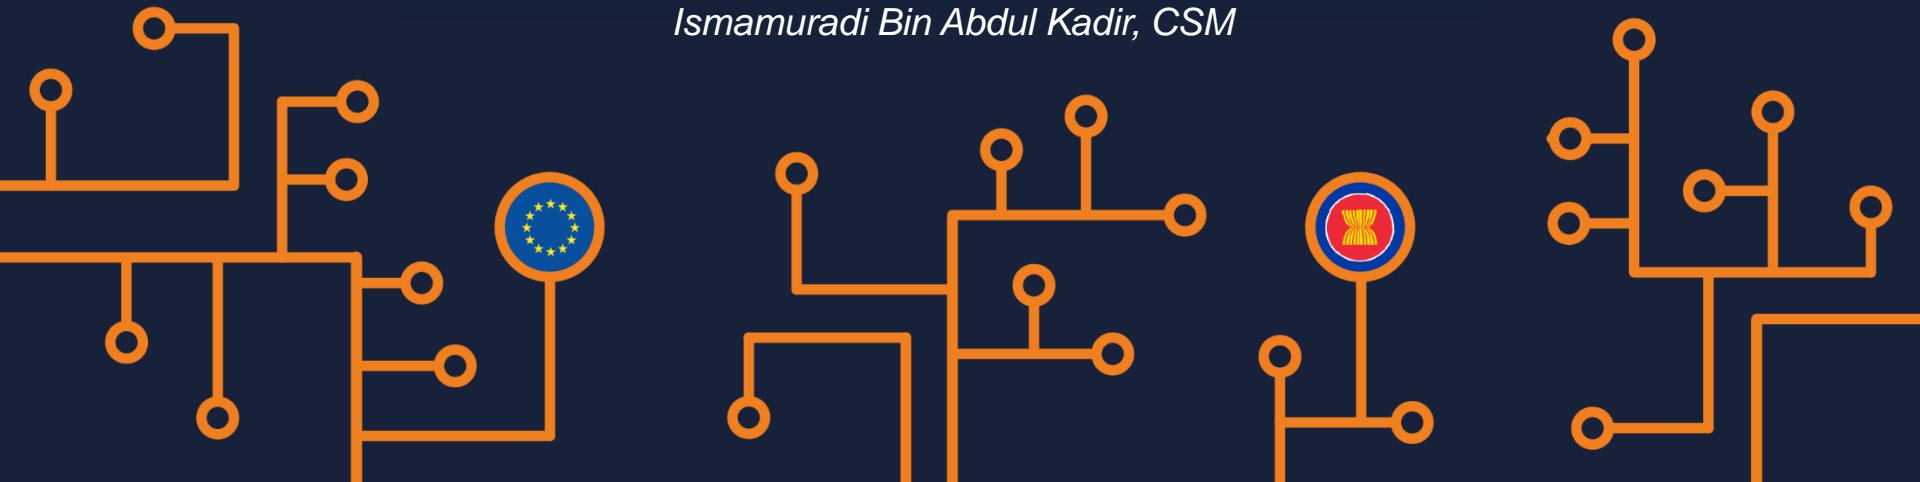

Final event – 9/12/2020

Svetlana Klessova, GAC

Alessandro Guarino, StAG

Krisztina Dax, GAC

Ismamuradi Bin Abdul Kadir, CSM

YAKSHA – Roadmap

- **The YAKSHA platform and services will be brought to a wider group of end users in 2021**
- **YAKSHA partners will ensure the continuous development and support of the developed platform after the upcoming completion of the funding period.**
- **Issues identified in the course of the pilot projects will be addressed and features will be added in order to cross the gap to market uptake**
 - NOTE: it is not a foreseen outcome of Horizon R&D projects to produce a complete, ready for market product or service.
- **After the end of the Horizon project, installations of YAKHA will keep running, being updated and gathering datasets.**

YAKSHA – Roadmap

- **The partners aim at continuous involvement with the ambassadors' community**
- **The community will be able to leverage the platform and outcomes as soon as the most important issues have been addressed**
- **The ASEAN region will be a priority in the YAKSHA development**

Project «**YAKSHA – Cybersecurity Awareness and Knowledge Systemic High-level Application**» aims to reinforce cooperation between the EU and ASEAN and build partnerships in the Cybersecurity domain by developing an innovative software solution for malware detection, collection and analysis.

The project **presents an opportunity** for everyone willing to **contribute** to:

- **Enhancing** Cybersecurity readiness levels
- **Reducing** cyber-risks
- Better **preventing** cyber-attacks
- Better **governing** the whole Cybersecurity process

in the ASEAN

by becoming a YAKSHA Ambassador!

Question n°1

How the pandemic has changed the cybersecurity priorities for your organisation?

Has it made more complex to secure your assets (re. smart working for instance) ?

Question n°2

Has the pandemic crisis shifted your preferences in acquiring cybersecurity products and services (e.g. focusing on domestic market more, different kind of tools bought etc.)?

Question n°3

Would you appreciate more details on cyber security threats trends (e.g. botnets or novel malware...) in order to achieve better awareness of the risks and better resilience?

Question n°4

Would you prefer a cloud-based solution or an installation on-premise for a thrust intelligence tool like YAKSHA?

Question n°5

As a YAKSHA ambassador, what would be the cooperation mode you are most interested in e.g. channel partner, sales/ provision of supplementary services e.g. trainings, advice/ analysis of YAKSHA reports (relevant for security companies)?

Thanks!

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 780498
